

3 Day Workshop Program on IOT with Arduino (NODEMCU) February 4-6, 2019

“IOT with Arduino (NODEMCU)” 3 Day Workshop program was organised by Department of Electrical Engineering from 4th February to 6th February 2019 for 2nd, 3rd and 4th year students. The workshop was organised with technical collaboration from Webskitters Academy. On 4th February the Program was inaugurated by Head of the Department by a very lucid speech on the application on IOT in Electrical Engineering.

The Objective of the Workshop is to impart in-depth knowledge in data transmission through cloud by IOT devices. Arduino is applied with different sensors and relays in hands on sessions. Technical sessions were demonstrated by Mr. Kaustav Madhab Chatterjee of Webskitters Academy. 27 Participants got Certificate after completion of the workshop and We are provided with some IOT hard wares by the Collaborators.
